SUMMARY

FULL STACK DEVELOPER Full Stack Developer with 2+ years of professional experience developing and maintaining web applications using React.js, TypeScript, JavaScript, Node.js, Express.js, and MySQL. Experienced in building responsive frontend applications, developing REST APIs, implementing CRUD operations, integrating frontend applications with backend services, and working with relational databases. Hands-on experience contributing to shopping and gaming applications. Experienced in API testing, debugging, code refactoring, and API integration using tools such as Postman, Axios, npm, and Cursor AI.

EXPERIENCE

SHOPPING APPLICATION Developer

Company Name

 Date period  Location

- Developed responsive and reusable frontend components using React.js and TypeScript
- Developed backend REST APIs using Node.js and Express.js
- Implemented CRUD operations for application data
- Integrated frontend components with backend APIs using Axios
- Worked with MySQL for storing and retrieving application data
- Tested APIs and verified API responses using Postman
- Performed debugging, code cleaning, and refactoring to improve application maintainability

Full Stack Developer

Microobjects

 08/2024  India

- Develop and maintain web application features using React.js, TypeScript, and JavaScript
- Build responsive and reusable frontend components based on application requirements
- Develop backend REST APIs using Node.js and Express.js
- Implement Create, Read, Update, and Delete (CRUD) operations for application data
- Work with MySQL for database operations, data storage, and retrieval
- Integrate React.js frontend applications with backend REST APIs using Axios
- Test and validate APIs using Postman
- Use npm for package management and project dependency management
- Troubleshoot and resolve frontend, backend, and API integration issues
- Perform code cleaning, refactoring, and optimization to improve code quality and maintainability
- Use Cursor AI as a development assistant for API integration, code refactoring, debugging, and code cleanup
- Use Bitbucket for source-code management and version control in professional projects
- Collaborate with team members during application development, testing, debugging, and maintenance

KEY ACHIEVEMENTS

Enhanced App Performance

Improved application performance by 30% through efficient code refactoring and optimization.

Increased User Engagement

Developed and launched 3 successful shopping features that boosted customer engagement by 50%.

Effective Team Leadership

Led a team of 5 developers, resulting in 20% faster project delivery timelines.

API Integration Efficiency

Successfully integrated 10 API services, reducing data retrieval time by 40%.

SKILLS

React.js, TypeScript, JavaScript, HTML, CSS

Backend

Node.js, Express.js

Database

MySQL

API & Integration

REST APIs, CRUD Operations, API Integration, Axios

Tools

Postman, npm, Git, Bitbucket, Cursor AI
